EDUCATION

University of Illinois Urbana-Champaign M.S. in Electrical and Computer Engineering Advisor: Varun Chandrasekaran	Current
University of Illinois Urbana-Champaign B.S. in Computer Engineering, Minor in Statistics GPA: 3.85/4.00	2022 - 2026

PUBLICATION

Do AI Reviewers Converge? Diversity Collapse in Model-Generated Peer Review

Accepted to Findings of EMNLP. [Paper]

Study of review diversity across 509 ICLR papers, 1,943 human reviews, and 10,172 reviews from five LLMs. Examines praise-to-critique balance and semantic convergence; specialized agents reduce but do not eliminate diversity collapse.

WORK EXPERIENCE

Shanghai AI Laboratory Scientific Simulation & 3D Asset Generation Shanghai, China - Developed simulations of experiments involving chemical phenomena using Isaac Sim. - Worked on the generation of 3D scientific assets.	Summer 2026
Shanghai Artificial Intelligence Research Institute Data Analyst Intern Shanghai, China - Built regression models for hospital construction costs and logistic regression pipelines for credit card fraud detection; performed data preprocessing and visualization. - Developed a PyTorch / YOLOv8 object detection model for soccer player detection.	May - Jul 2023

RESEARCH EXPERIENCE

Multimodal Biometric Representation Research Summer Research Intern Prof. Wenyan Dong, Westlake University Hangzhou, China - Studied relationships between voice and facial anthropometric features using physiological and vocal tract theory. - Built a voice-to-face prediction pipeline with uncertainty-aware 3D facial estimation; explored diffusion-based voice features aligned with facial geometry.	Started Apr 2025
Fairness Guarantee under Demographic Shift Supervised by Prof. Pradeep Ravikumar, Carnegie Mellon University - Designed and evaluated a fairness-aware algorithm under demographic, covariate, and marginal shifts, using PyTorch multilayer perceptrons for experimental validation.	Jul - Aug 2023

TEACHING EXPERIENCE

Undergraduate Course Assistant - CS 124, ECE 110, STAT 400 University of Illinois Urbana-Champaign - Supported over 100 students through office hours in Java programming, circuit analysis, and statistical modeling. - Graded assignments and lab reports, mentored new teaching assistants, proctored exams, and coordinated with faculty.	Started Aug 2023
---	------------------

SELECTED PROJECT

Serverless Workload Classification Mentored by Haoran Qiu, Ph.D. student - Applied clustering and classification to OpenWhisk workloads, analyzing datasets by cloud platform characteristics.	Sep - Dec 2023
---	----------------

TECHNICAL SKILLS

Languages: Python, Java, C/C++, SQL, SystemVerilog, LC-3, JavaScript, HTML

Tools: PyTorch, scikit-learn, React, Git, Isaac Sim | **Focus:** LLM evaluation, algorithmic fairness, scientific simulation, 3D scientific asset generation
